Disclaimer: This document is for information purposes only. No guarantee of results is implied.

The deduction you can take on your tax return will only be based on the fair market value of the car if the charity does one or more of the following:

- Uses donated cars in a way that is significantly beneficial to the community
- Makes major repairs to the vehicle, thus increasing the value of the car
- Sells or donates the car to a person or another NFP entity in need at a below-market price
